Checklist for HBB training

OSCE – STATION A

Instructions to the learner (facilitator reads aloud)

I am going to read a role play scenario. Please listen carefully, and then demonstrate for me the actions you would take. As you proceed, I will indicate for you the baby's response (through the simulator or describing it verbally), but will provide no feedback until the end of the evaluation.

Case Scenario

You are called to assist the delivery of a term baby. You do not need to take a history. The baby is born in less than 10 minutes. Introduce yourself and prepare for the birth and care of the baby.

Skill	Done	Not Done
Prepares for birth		
Identifies helper and makes an emergency plan		
Prepares area for delivery		
Washes hands and maintains clean technique throughout		
Prepares an area for ventilation		
Prepares and checks equipment		
Prompt: after 5 – 7 minutes give baby to learner and say the amniotic fluid is clear. Show how you will care for the baby		
*Dries the baby thoroughly		
Removes wet linen		
Evaluates baby is crying or not (not crying) Prompt show or say the baby is not crying		
*Recognizes baby is not crying		
Provides initial steps to stimulate breathing		
*Positions head and clears airway		
Stimulates breathing by rubbing the back		

Evaluates response to initial steps (breathing well) Prompt: Show or say the baby is breathing well		
Evaluates breathing		
Recognizes baby is breathing well		
Clamps or ties and cuts the cord		
Positions skin-to-skin on mother and communicates with mother		

OSCE – STATION B

Instructions to the learner (facilitator reads aloud)

I am going to read a role play scenario. Please listen carefully, and then demonstrate for me the actions you would take. As you proceed, I will indicate for you the baby's response (through the simulator or verbally), but will provide no feedback until the end of the evaluation.

Case Scenario

You are called to assist at the birth of 34 week (7½ months) gestation baby or baby with meconium stained liquor. You arrive 2 minutes to the birth. Introduce yourself and show what you will do

Skill	Done	Not done
Washes hands and maintains clean technique throughout		
Prepares and checks equipment		
Dries the baby thoroughly		
Removes wet linen		
Evaluates baby is crying or not (not crying) Recognizes baby is not crying		
Provides initial steps to stimulate breathing		
Positions and clears airway		
Stimulates breathing by rubbing the back		
Evaluates response to initial steps (not breathing)		
<i>*Recognizes baby is not breathing</i>		
Cuts the cord		

Moves baby for ventilation		
Ventilation with bag and mask		
<i>*Selects appropriate size mask</i>		
<i>*Ventilates at 40 breaths per minute</i>		
<i>*Starts ventilation within the Golden Minute</i>		
Evaluates breathing (not breathing, chest not moving-may require verbal feedback)		
Recognizes baby is not breathing		
Calls for help		
Improves ventilation		
<i>*Re-applies the mask</i>		
<i>*Repositions the head</i>		
<i>*Clears secretions, good heart rate</i>		
<i>*Ventilates with mouth slightly</i>		
<i>*Squeezes bag harder</i>		
Evaluates breathing and heart rate (not breathing, good heart rate)		
Recognizes baby is not breathing but heart rate is normal		
Continues to ventilate
